## OBJECTIVE

---

Software engineering student at the University of Jeddah with a 4.31 GPA, seeking a software engineering internship. Experienced in front-end development, UI/UX design, and IoT systems, with multiple projects showcased at university exhibitions.

## EDUCATION

---

**University of Jeddah**, *Software Engineering*

2022 – Present

**GPA:** 4.31/ 5.00

## SKILLS

---

**Technical:** HTML, CSS, JavaScript, Java, GitHub, Figma

**Soft:** Team collaboration, Project Management, Public Speaking, Problem Solving, Attention to Details

## PROJECTS

---

### Jeddah Gate Website

- Built a website helping locals and tourists explore Jeddah, with a MySQL database storing user reviews and contact submissions.

### Smart IoT Traffic Management System

- Developed an IoT system to optimize traffic flow and prioritize emergency vehicles; presented an integrated hardware and cloud solution at a University event.

### Personal Links Page

- Built a custom personal links page using HTML and CSS, deployed on Netlify, and connected to an NFC card so recruiters can tap it to instantly access all my profiles and CV.

### Conscious Closet Prototype

- Designed an interactive prototype for a sustainable wardrobe app using Figma; showcased at the University of Jeddah "Our Interface Speaks" exhibition.

## ORGANISATIONS

---

**Data Science Club**, *Project Management Team Member*

03/2026
